

# 2026 Product Catalog

For runners who transcend distance.

A wide-angle photograph of a runner on a paved road overlooking the ocean at sunset. The runner is in the lower center, wearing a dark long-sleeved shirt, shorts, and white socks with shoes. The road has a yellow double line and a white single line. The ocean is a deep blue-green, and the sky is a warm orange and yellow. The background shows distant mountains.

## Our Mission

# For runners who transcend distance.

Mount to Coast is a performance footwear brand rooted in long-distance running. We create shoes that meet the standards of the world's toughest races and allow ultrarunners to test their limits.

# Testimonials

# Presenting Sponsor of Badwater®

We have partnered with Badwater®, the world's toughest footrace, to create the R135, a special-edition R1, and support runners on site.

## R135 - Official Shoe of Badwater® 135

Each July, the Badwater® 135 creates heroes of the men and women who assemble in Death Valley to run 135 miles across the desert, so this year, we have created the R135, a special-edition R1, tailored to that unique challenge.

For runners who transcend distance.

## R135 - Official Shoe of Badwater® 135

At 2025 Badwater® 135, 23.2% of its competitors have chosen Mount to Coast, making us the most trusted ultrarunning brand on the course.

# UTMB

2025 marked our debut at UTMB Mont-Blanc. We joined the Ultra Trail Village, hosted a series of demo runs, and built a team to take on the races across the week.

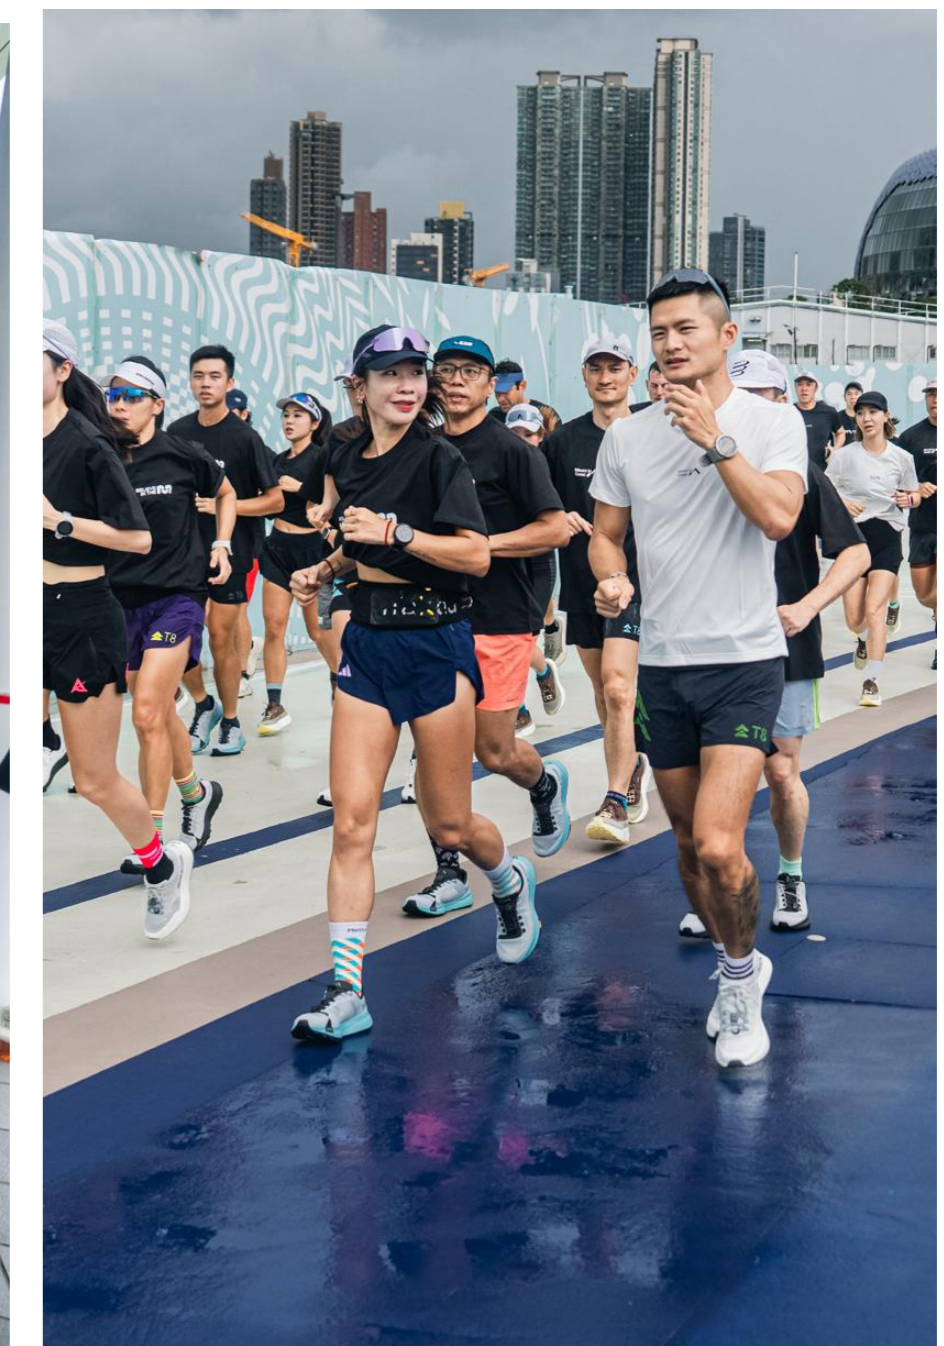

# Global Events

In addition to the US, we're expanding into new regions and have hosted events across the globe.

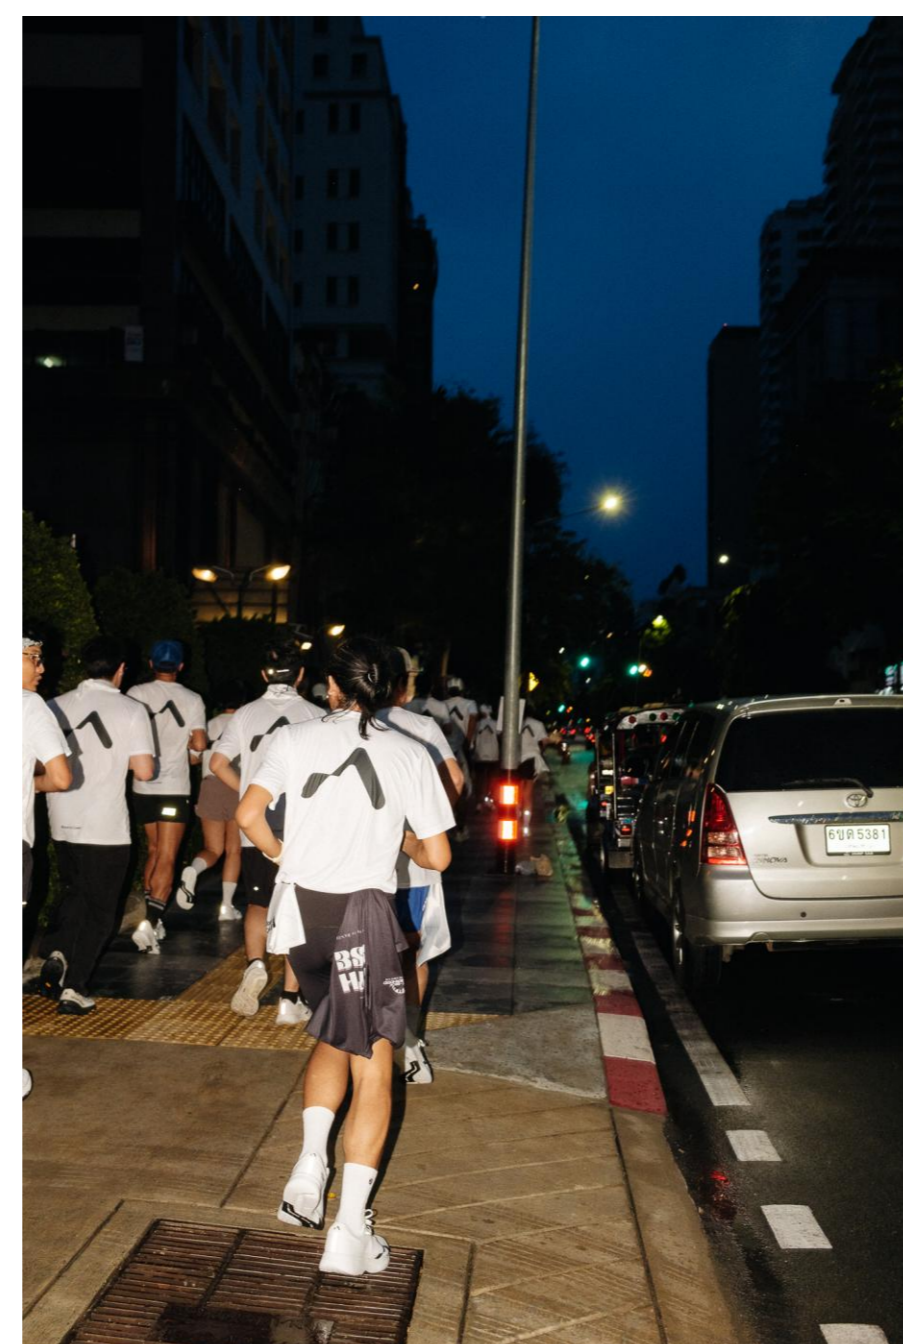

## H1 Demo Tour in the US

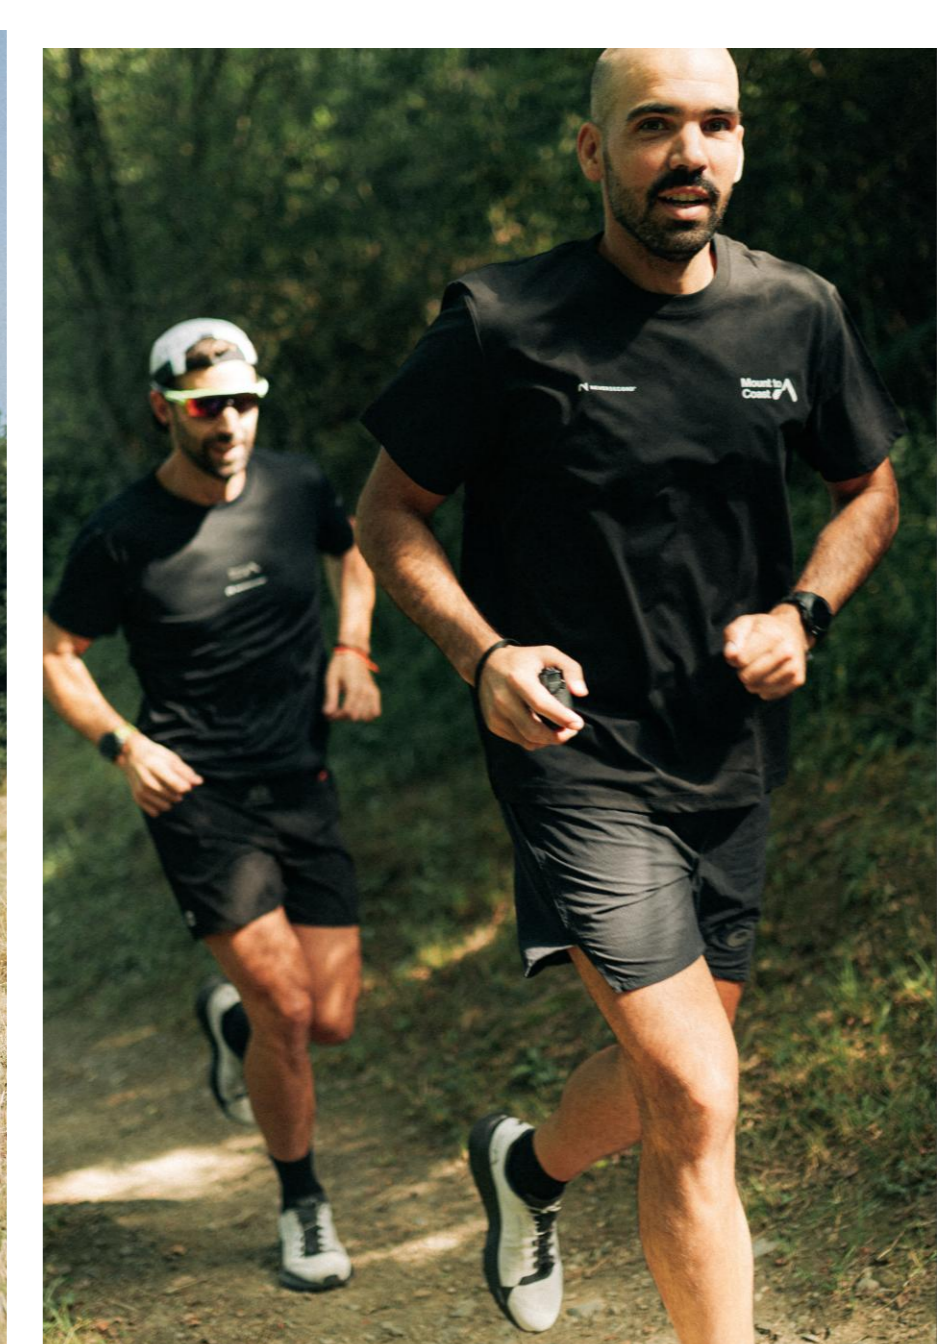

## Hong Kong Demo Run x Believe in the Run

## Thailand Launch Event x RNG

## Switzerland Demo Run at Eiger Ultra Trail

# Our Technology

We aim to deliver a revolutionary running experience with bold innovation.

## JETCELL

**JETCELL™** is our next-gen supercritical midsole foam engineered for the toughest trails. It delivers our highest energy return and consistent stability in any condition, with twice the material strength of PEBA.

**ZeroSag™** is a groundbreaking midsole insert co-developed with BASF. Originally used in the suspension systems of race cars, it guarantees extraordinary cushioning on the longest runs.

**CircleCELL™** is the first high performance midsole material to be made of 100% renewable feedstock, including recycled organic waste. Through our state-of-the-art supercritical foaming, CircleCELL™ offers PEBA-level energy return with almost double PEBA's running lifespan.

**3D Archrail™** is our revolutionary flexible support structure designed to manage complaints related to overpronation, enhance stability, and focus on forefoot alignment.

**VersaGrip™** is our proprietary outsole technology engineered to deliver exceptional traction, grip, and durability across all terrains. Designed for your longest journeys, it guarantees optimal performance on every surface you encounter.

**LightCELL™**, our proprietary midsole base material is a nitrogen-infused supercritical foam that is 50 percent lighter than EVA, while offering 45 percent more energy return.

**The TUNEDFIT™** Dual Lacing System offers separately customizable fit for the forefoot and midfoot. Even if your feet swell in the pursuit of distance, you can still relax and enjoy the ride.

**GOFLOW™** is our research-backed, industry-leading midsole geometry, designed to provide extra support to let you experience the natural, seamless flow from heel to toe.
